VTEX

Configuring PayPalPlus

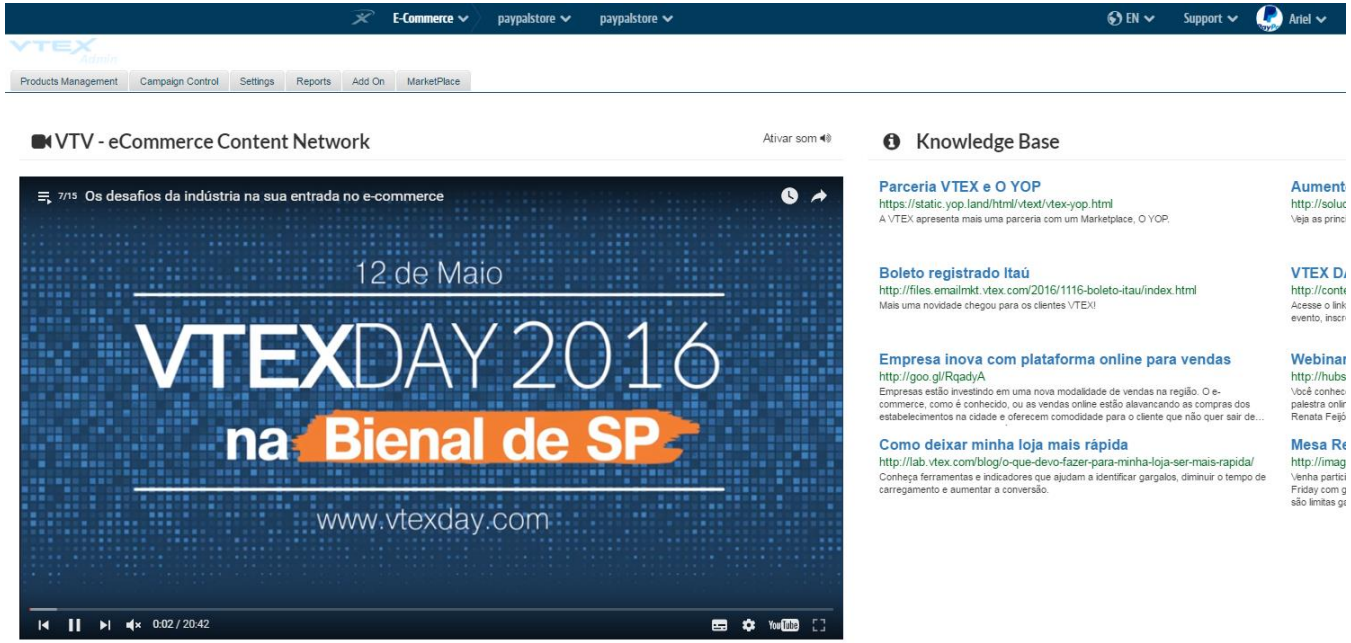
Walkthough to enable PayPalPlus on VTEX Platform.

©2016 PayPal Inc. Confidential and proprietary.

STEPS

1. Login on VTEX admin portal.
2. Setup a new Gateway affiliation.
3. Configure a new Payment Condition.
4. Customize the UX for the product.

STEPS 1- Login on the VTEX ADMIN



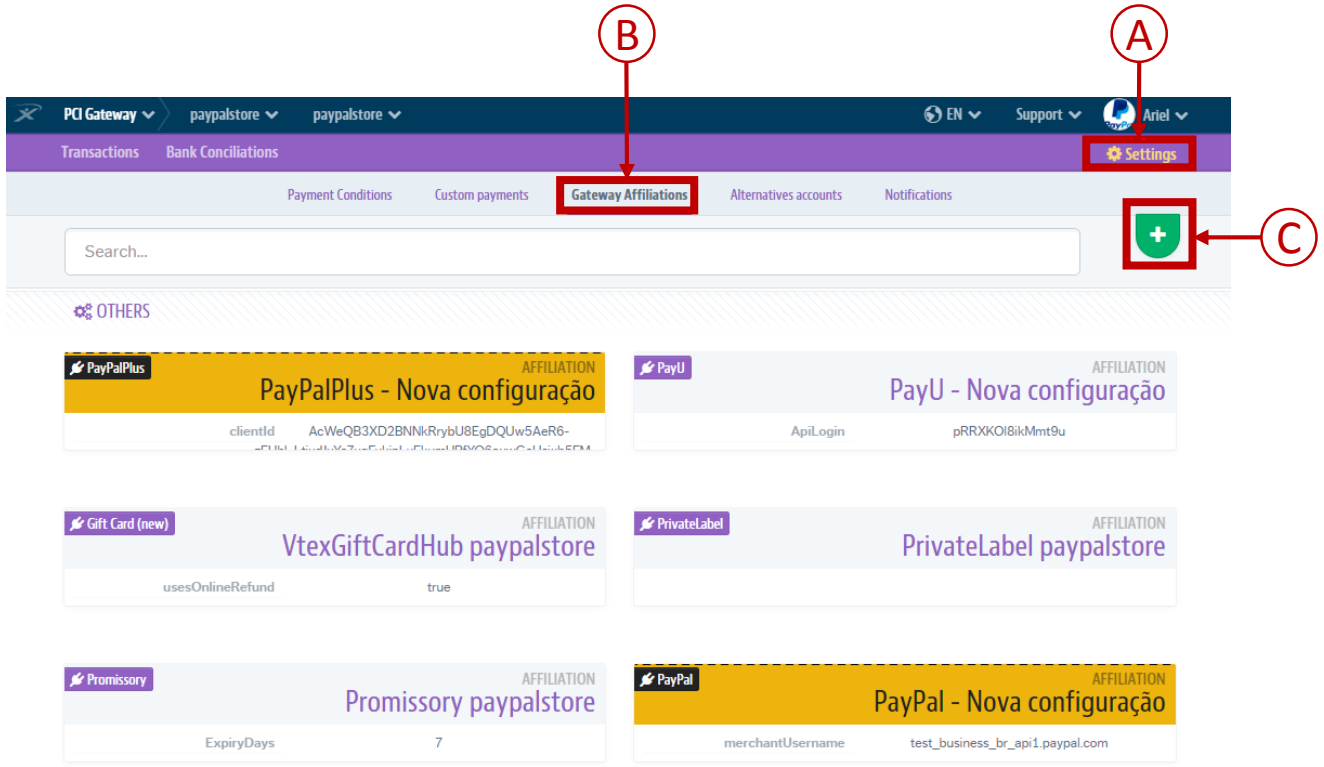
- Instruct the merchant to access his Admin stable environment, by default if should be similar to the exemple below:

https://*{MERCHANT_DOMAIN}*.vtexcommercestable.com.br/admin.

STEPS 1- Login on the VTEX ADMIN

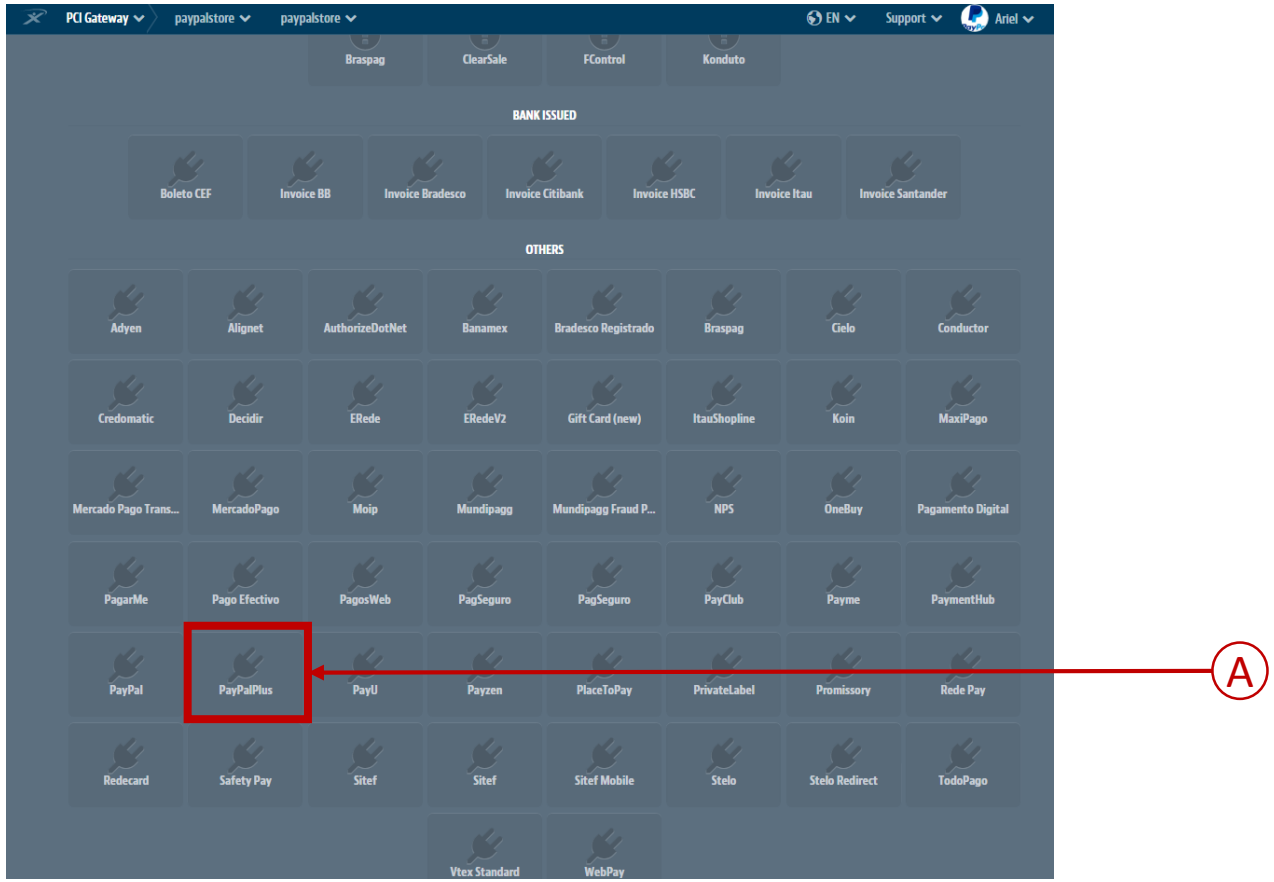
- After being logged on the ADMIN, click on the **E-Commerce TAB (A).**
- Then select the Option **PCI GATEWAY (B).**

STEPS 2- Setup a new Gateway affiliation



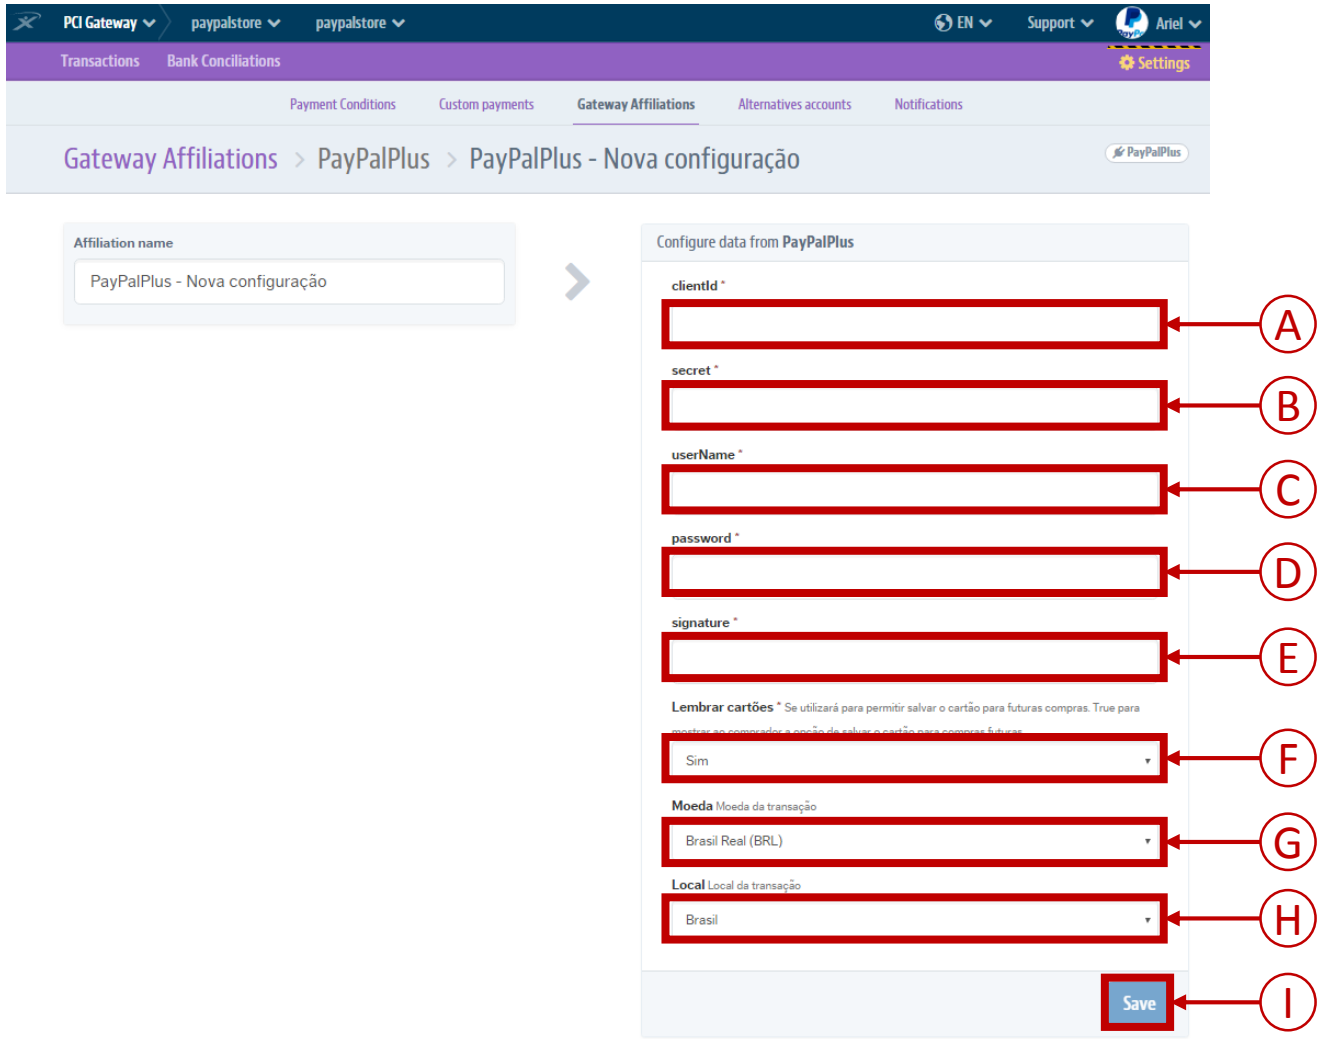
- On the PCI Gateway View, click on the **Settings (A)** option.
- Enter the Gateway **Affiliations Tab (B)**.
- And add a new **Gateway Affiliation (C)**.

STEPS 2- Setup a new Gateway affiliation



- On the new Gateway Affiliation view, select the PayPalPlus (A) option.

STEPS 2- Setup a new Gateway affiliation



- On the New PayPalPlus configuration, you will have to provide the following information:.

- REST ClientID (A).
- REST SecretID (B).
- CLASSIC UserName (C).
- CLASSIC Password (D).
- CLASSIC Signature (E).

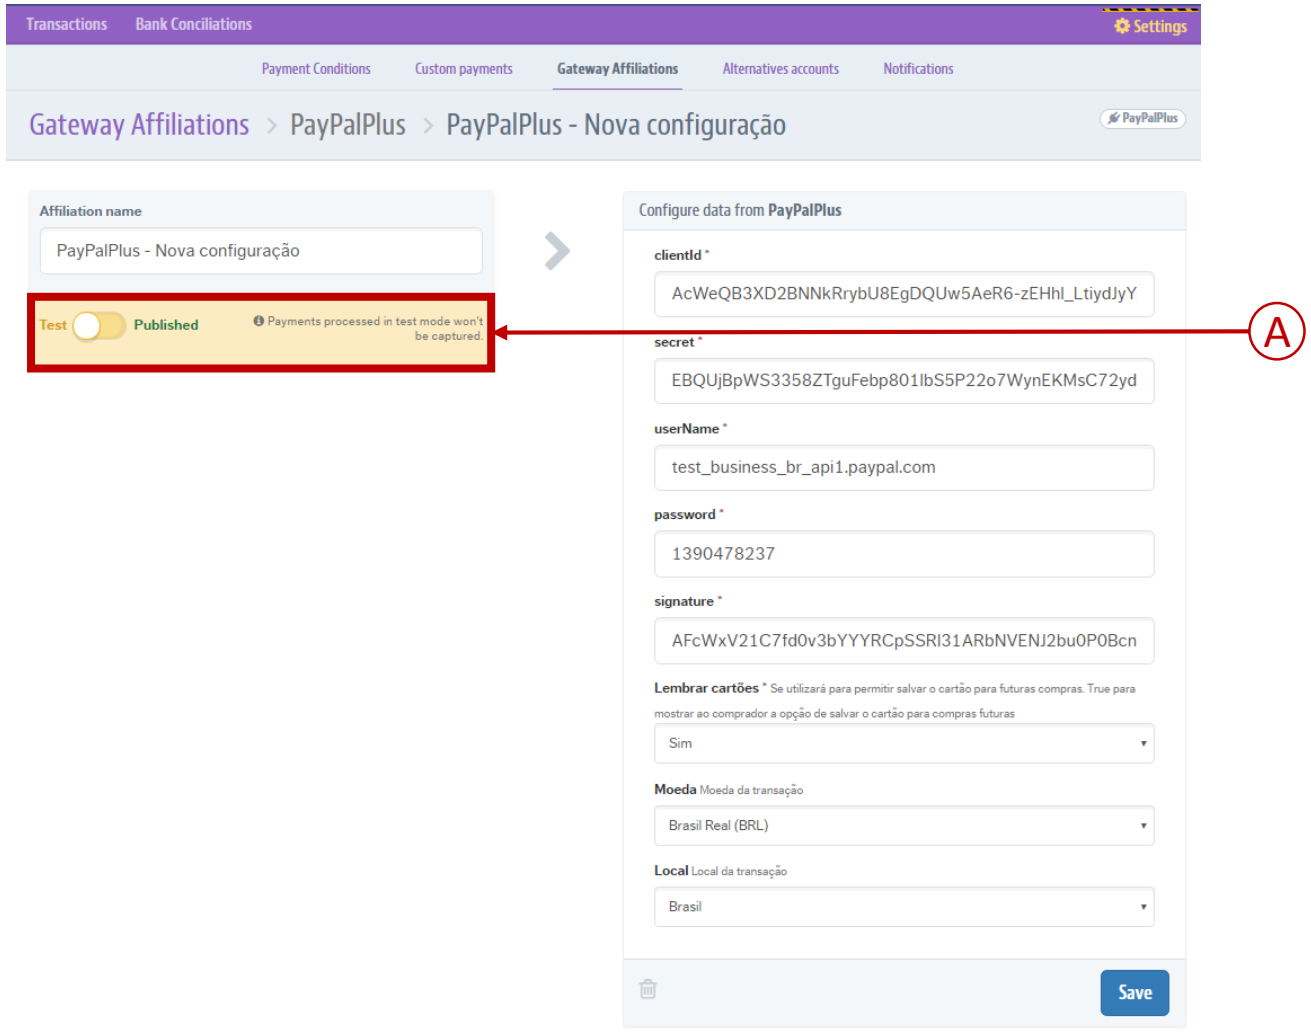
- Select if you want the merchant to have or not the **RememberCard (F)** functionality.

- Define the **Currency (G)** .

- Define the **LocaleCode (H)** for the Transaction.

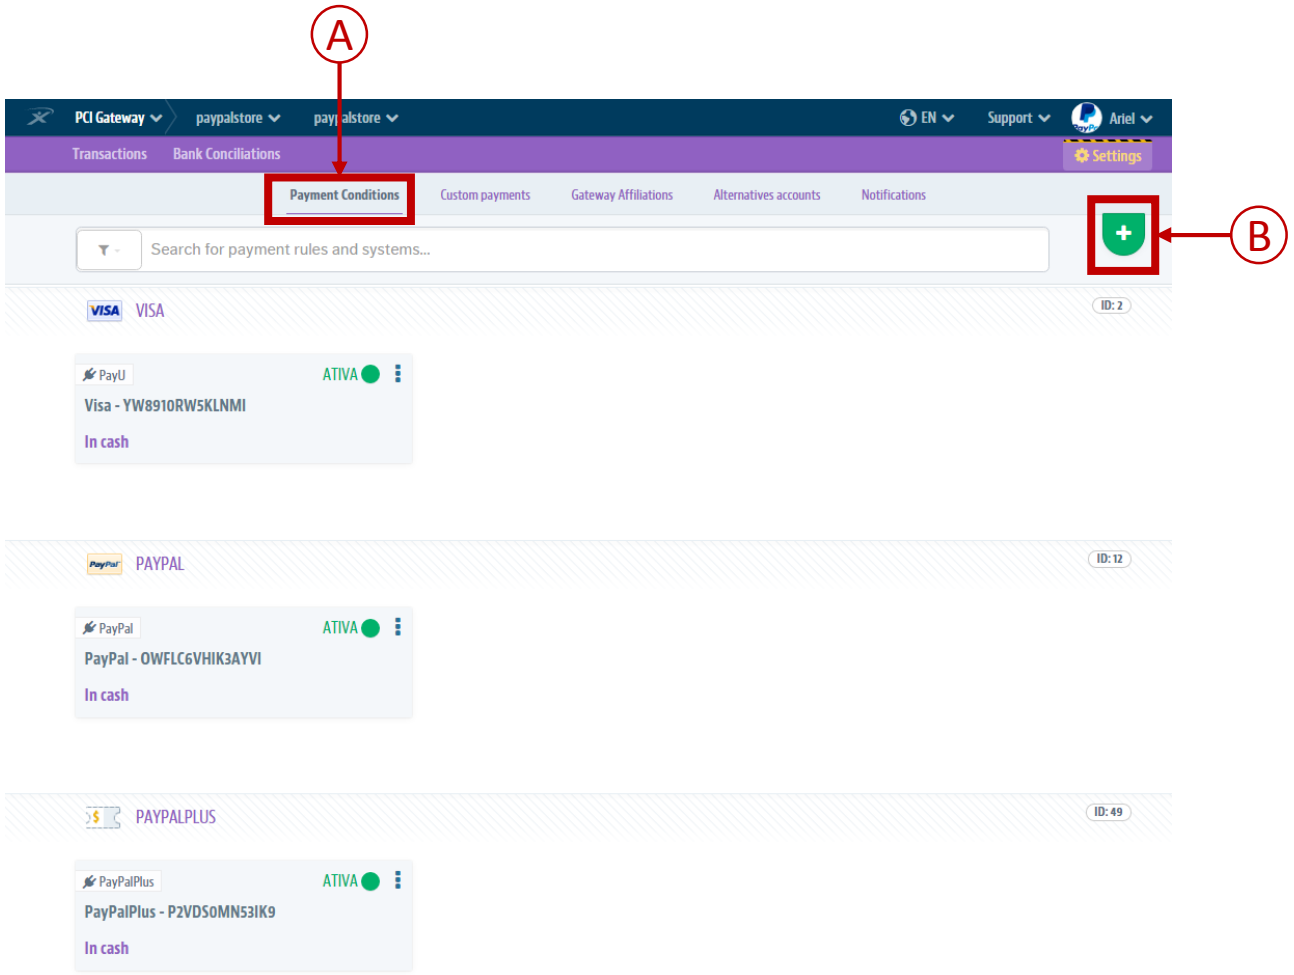
- After have all this configuration setup, click to **save (I)** this configuration.

STEPS 2- Setup a new Gateway affiliation



- After completing the configuration, select is this configuration and credentials is for **Sandbox** or **Live (A)** PayPal Environment.
- *We highly recommend to first test with the merchant using the sandbox enviroment and credentails.*

STEPS 3- Configure a new Payment Condition.

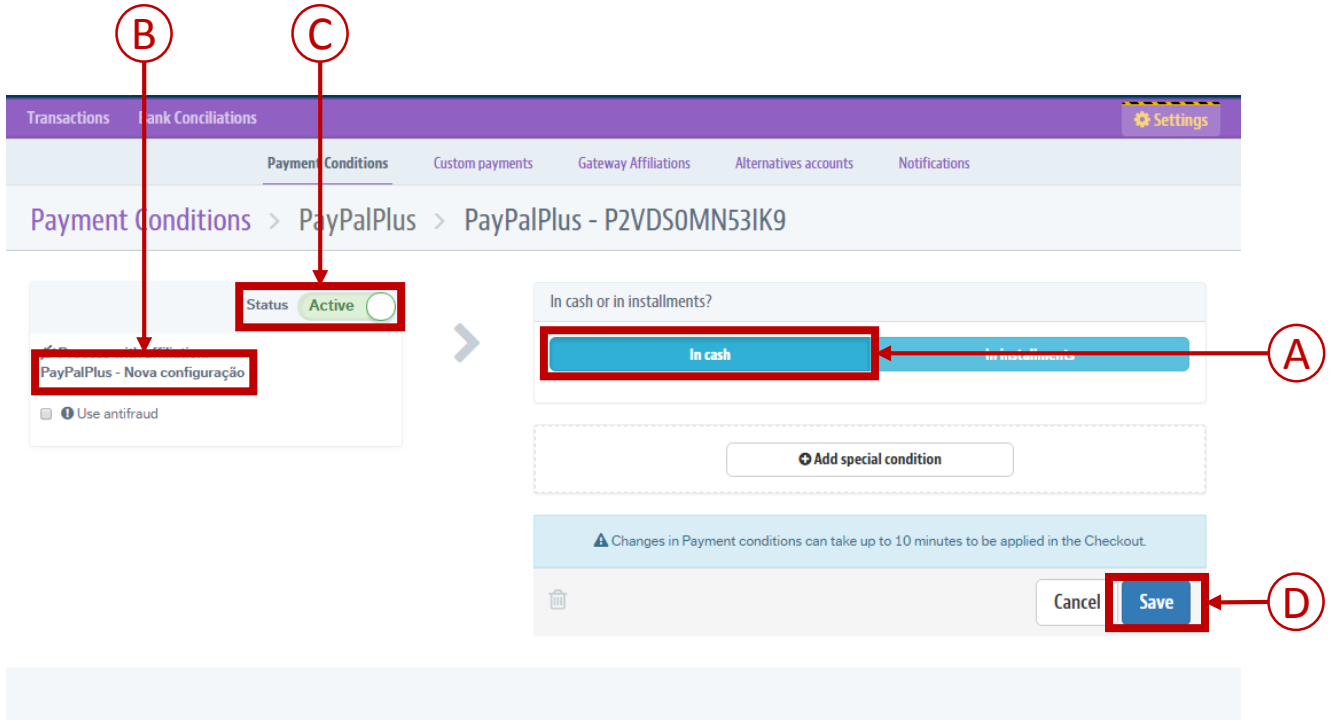


- Now we are going to configure the payment condition. To do that, change the tab to the Payment Condition **(A)**.
- The add a new Payment Condition **(B)**.

STEPS 3- Configure a new Payment Condition.

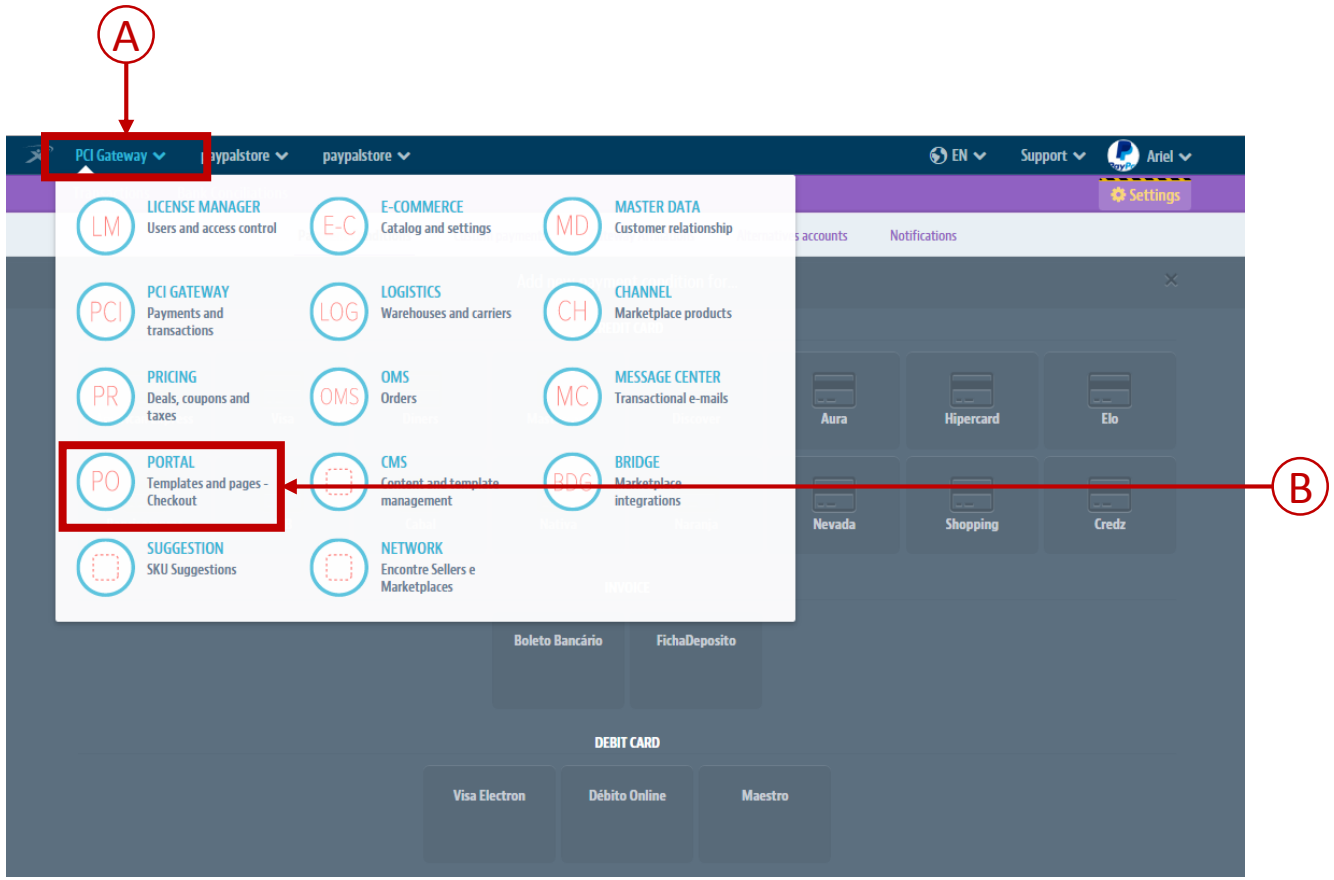
- On the new Payment Condition view, select the PaypalPlus (A).

STEPS 3- Configure a new Payment Condition.



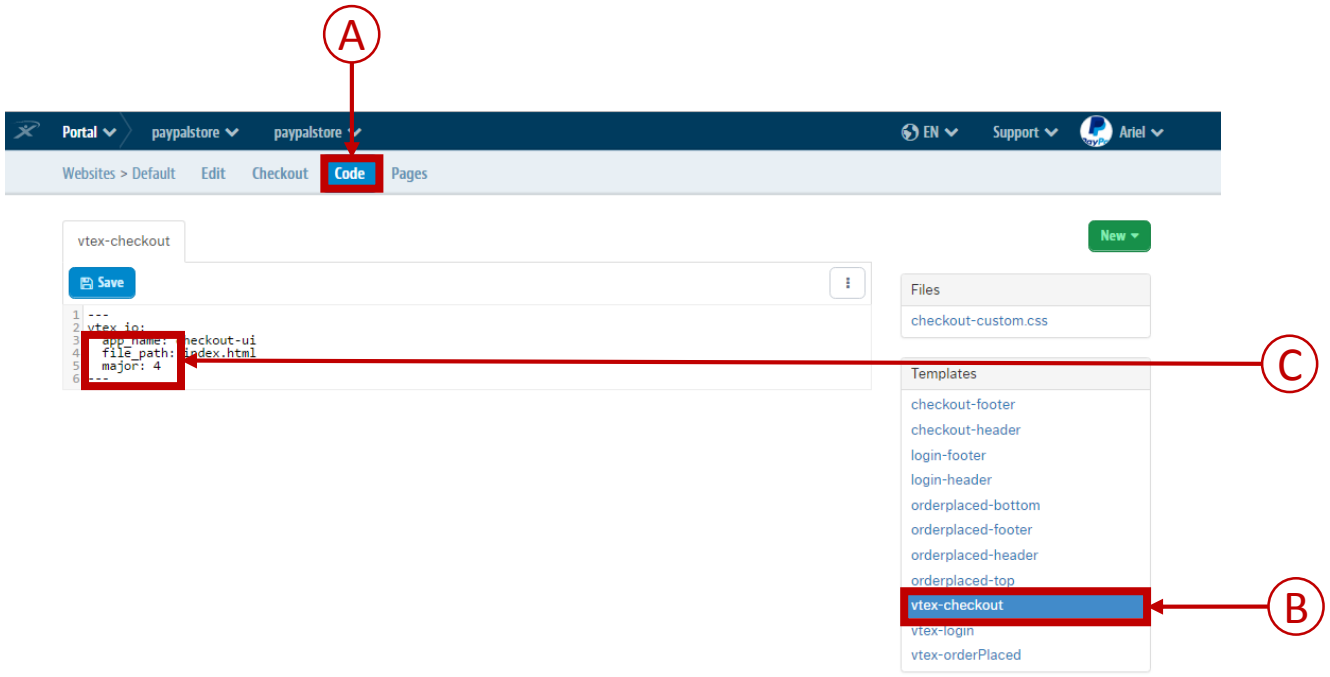
- On the new Payment Condition creation, Set the installments options as default (in cash) **(A)**, since this configuration is only set on the PayPal side, there is no need to configure on VTEX side.
- Select the Affiliation **(B)** created previously, (PayPalPlus).
- Set the Status as Active **(C)** .
- And finally click on SAVE **(D).**

STEPS 1- Login on the VTEX ADMIN



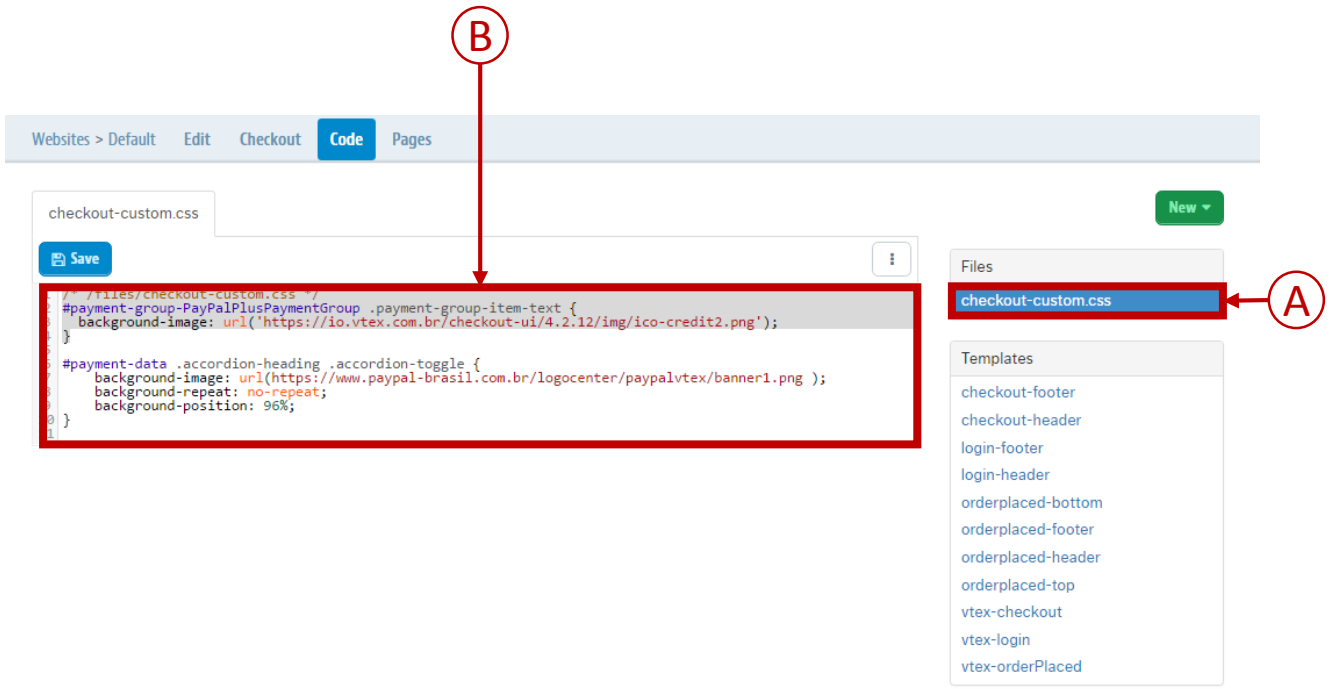
- To finsh te configuration go the the Templates page, first click on the PCI Gateway Tab (A).
- Then select the PORTAL (B) option.

STEPS 4 - Customize the UX for the product.



- Go to the Code (A) tab.
- Select the vtex-checkout template (B), and include the following parameter:
- *Major: 4 (C)*, then save the change.
- *The configuration is now completed the payment solution takes around 10 to 15 minutes for this to be replicated in live.*

STEPS 4 - Customize the UX for the product.



- You can also change how the payment solution UX looks like. To do that:
- Select the checkout-custom.css **(A)** and define the class you have to change, in this case will be the PayPalPlus class:
- For the example below we will change the Icon for the payment solution, using the following code **(B)** :

```
/* /files/checkout-custom.css */
#payment-group-PayPalPlusPaymentGroup .payment-group-item-text {
  background-image: url('https://io.vtex.com.br/checkout-ui/4.2.12/img/ico-credit2.png'); }
```

- After you have made all the changes you wanted, click on save, and wait for the changes to be replicated.
